Window to the World -

Window to the World is a week of “Internationalisation at home” at the Faculty of Education and International Studies, Early Childhood Education Programme of Oslo University College (OUC). OUC offers the broadest portfolio of professional studies available in Norway. Our teaching is founded on research and characterised by a close interaction between students and academic staff. . During this week we want to provide students with international perspectives upon the discipline.

On this website you will find information about the 18 teachers visiting us and what their contributions to the students are. You can sign up on different activities - some of the workshops have a limited number of participants.

Opening session

Opening session at 09:30 a.m. October 15, closing October 17th 2008
